

Command Posts

Features

- ✓ Rapid-deploy command posts built for battlefield-ready operations
- ✓ Seamless integration with mission-critical communication networks
- ✓ Modular expandable shelters adaptable to simple or complex layouts
- ✓ Fully integrated power and HVAC enabling autonomous operations
- ✓ Mobile containerised systems supporting rapid redeployment and agility
- ✓ Advanced RF shielding ensures secure, protected battlefield
- ✓ High stowed-to-deployed ratio maximises space and transport efficiency
- ✓ Custom-built expandable containers engineered for complex requirements

Supporting the warfighter with the latest in Command Post shelter technology

Product Overview

Weatherhaven designs and manufactures the world's most advanced military command post shelters. Engineered for rapid deployment, battlefield durability, and cutting-edge communication, each command post integrates seamlessly with mission-critical systems. Trusted by elite forces, Weatherhaven redefines tactical superiority through precision design, modular innovation, and unmatched operational performance in any combat environment.

Our deployable and expandable clean air spaces are delivered as complete solutions, integrating electrical, lighting, furniture, environmental controls, and other essential systems. Designed to meet the specific requirements of your mission, these shelters arrive fully equipped for immediate deployment. Because the integration is conducted in our own facilities, we can accommodate the most challenging of system requirements, ensuring seamless compatibility and enhanced operational efficiency. The result is a rapidly deployable solution tailored to your operational needs.

The very best in Command Post technology

Weatherhaven has delivered a wide variety of Command Post layouts, ranging from functional to highly complex integrated systems. These shelters support secure and insecure networks, situational awareness tools, mesh radio services, RF shielding, and other mission-critical technologies. Every system is integrated to meet exacting requirements, ensuring smooth compatibility across mission networks. This flexibility means that whether for a small tactical post or a highly connected operational hub, our solutions meet the unique

Standard Specifications

Command Posts specifications can vary depending on your configuration
