Weatherhaven

Proven Expertise In Redeployable Shelters & Camps

Mining and Exploration Camps

Features

End-to-End Remote Mining Camp Solutions

- Fully integrated remote camps enabling efficient global mining operations
- Proven solutions built on decades of mining sector experience
- Durable modular shelters engineered for extreme remote environments
- Integrated utilities delivering power, water, and environmental control
- Scalable camp designs supporting exploration through full lifecycle
- Optimised logistics enabling rapid, cost-effective global
- End-to-end delivery reduces risk and simplifies remote operations
- Comfortable accommodation and catering supporting

Product Overview

Weatherhaven specialises in the delivery of fully integrated remote mining camps that enable operations to function efficiently in the world's most challenging environments. With over four decades of experience supporting mining and exploration projects globally, the company has developed a reputation for reliability, technical excellence, and rapid deployment. By combining engineering expertise with practical field knowledge, Weatherhaven ensures clients can focus on productivity while all infrastructure and accommodation requirements are seamlessly managed.

Our long-standing involvement in the mining and exploration sector has shaped a deep understanding of operational realities in remote regions. Weatherhaven's solutions are designed to withstand extreme climates while maintaining high standards of safety, comfort, and performance. This experience allows us to anticipate challenges before they arise, delivering camps that are not only robust but operationally efficient, scalable, and tailored the project's lifecycle, from early

Weatherhaven

Proven Expertise In Redeployable Shelters & Camps

Proven Remote Camps. Built Without Compromise.

All Weatherhaven shelters are manufactured in-house, giving full control over quality, performance, and innovation. Our proprietary shelter range has been refined through over 40 years of field deployment in mining and exploration environments. These modular structures are engineered for durability, rapid installation, and adaptability, ensuring they meet demanding site conditions while providing comfortable, functional spaces for work and living in even the most isolated locations.
