

Aircraft Support

Features

- ✓ Rapid-deploy aviation hangars enabling mission-ready global operations
- ✓ Fully transportable structures built for extreme remote
- ✓ Seamless integration with complete turnkey camp infrastructure systems
- ✓ Designed by ex-military aviation experts for real operations
- ✓ Certified to FAA, CAA, and EASA aviation standards
- ✓ Scalable modular hangars for helicopters and fixed-wing aircraft
- ✓ Rapid assembly and flexible transport via air, land, sea
- ✓ Enables complete self-sustained aviation operations in remote

Rapid-deploy aviation hangars and technical infrastructure built for global operations and mission success

Product Overview

Weatherhaven delivers rapidly deployable aviation hangars engineered to support full aircraft operations in the most demanding environments worldwide. Designed for both military and commercial use, these structures combine portability, durability and performance, ensuring mission readiness from day one. Whether supporting forward operating bases or remote civilian airfields, our hangars integrate seamlessly into wider infrastructure, enabling clients to establish reliable, fully operational aviation capability quickly, efficiently and with complete confidence.

With over four decades of experience and deployments across every continent, Weatherhaven brings unmatched operational knowledge to aviation infrastructure projects. Our hangars are built on proven logistics, modular transport systems and field-tested engineering that perform in extreme climates. This global expertise ensures each solution is dependable, scalable and ready for rapid deployment, giving clients confidence that their aircraft operations are supported by infrastructure designed

Forward aircraft support. Deployed fast. Mission ready.

Our aviation hangars are designed as part of a complete operational ecosystem, not standalone structures. They integrate seamlessly with accommodation units, workshops, power systems and taxiway solutions to create fully functional aviation environments. This holistic approach allows clients to deploy entire airfield capabilities in remote or temporary locations. By combining infrastructure elements into a unified solution, Weatherhaven ensures efficient workflows, reduced downtime and streamlined operations

Standard Specifications

Aircraft Support specifications can vary depending on your configuration
