

Vehicle Workshops

Features

Keeping your fleet moving, anywhere in the world

- ✓ Deployable vehicle workshops keep fleets operational worldwide
- ✓ Modular scalable facilities adapt to mission size and complexity
- ✓ Containerised and shelter systems support diverse maintenance operations
- ✓ Rapid deployment enables immediate establishment of maintenance
- ✓ Integrated tooling supports welding, fabrication, tyre and
- ✓ Designed for extreme environments from deserts to arctic
- ✓ Transportable via air, land, sea for global mobility
- ✓ Replicates full workshop capability in remote austere locations

Product Overview

Weatherhaven specialises in designing and delivering advanced redeployable vehicle maintenance facilities tailored for military and commercial applications. Built to operate in austere and remote environments, these shelters provide essential infrastructure to keep fleets operational anywhere in the world. From container-based workshops to large arch frame shelters, each system is designed with mobility, durability, and mission-readiness at its core. This ensures effectiveness for both small operations and large, complex vehicle repair programs.

Our portfolio includes expandable 20 ISO container-based workshops and arch frame shelters that can accommodate heavy and oversized vehicles. These systems can be deployed independently or complexed to create scalable facilities. Designed for rapid deployment, they offer a cost-effective way to establish critical maintenance infrastructure without reliance on permanent structures. Whether supporting forward operating bases or remote commercial sites, these redeployable solutions ensure vehicles

Take your workshop anywhere in the world.

Our workshops and shelters are fully modular, allowing operators to scale facilities according to the size and complexity of their requirements. Single units can be deployed for localised vehicle repairs, while multiple shelters and containers can be complexed into expansive maintenance compounds. This scalability ensures flexibility across mission types, enabling customers to deploy the right level of infrastructure without compromise. Modular design also supports phased growth, allowing facilities to evolve with operational

Standard Specifications

Vehicle Workshops specifications can vary depending on your configuration
