

Mobile Clinics

Features

Hospital-Grade Healthcare, Anywhere in the World

- ✓ Hospital-grade mobile clinics delivering care anywhere globally
- ✓ Rapidly deployable expandable containers for medical operations
- ✓ Fully self-sufficient systems with power, water, climate control
- ✓ Supports full spectrum healthcare from triage to surgery
- ✓ Scalable, reconfigurable platforms adapting to evolving medical missions
- ✓ Standard transportable units enabling fast global redeployment
- ✓ Rugged construction performing reliably in extreme global
- ✓ Custom-designed layouts tailored to specific clinical requirements

Product Overview

Delivering hospital-grade healthcare anywhere requires speed, reliability, and full capability. Our deployable medical facilities are engineered for rapid global deployment, providing clinical environments comparable to permanent hospitals. Designed for civilian, humanitarian, and military use, these solutions combine mobility with advanced functionality. By removing infrastructure barriers, we enable healthcare teams to operate effectively in remote, disaster-affected, or infrastructure-limited environments, ensuring consistent, high-quality patient care wherever it is needed most worldwide.

Built on proven expandable container technology, our solutions maximise usable clinical space while maintaining efficient transport dimensions. Systems such as MECC, TRECC, and EHMECC expand rapidly on site, transforming compact units into fully functional healthcare environments. This approach enables easy transport by road, rail, sea, or air, followed by fast setup on arrival. The result is a highly mobile, scalable medical capability that can be deployed quickly

Mobile Clinics Engineered for Global Deployment.

Our expandable platforms dramatically increase internal workspace while maintaining standard shipping dimensions during transport. Once deployed, these systems provide spacious, fully equipped environments capable of supporting complex medical procedures. This innovative design ensures efficient logistics without compromising functionality, allowing healthcare teams to operate comfortably and effectively. By combining compact transportability with expanded operational space, we deliver a solution that

Standard Specifications

Mobile Clinics specifications can vary depending on your configuration
