

Tyre Maintenance

Features

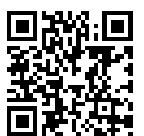

Deployable tyre workshops boosting readiness anywhere, anytime, with ease.

- ✓ Deploy complete tyre maintenance capability anywhere in theatre
- ✓ On-site repairs eliminate downtime and transport delays
- ✓ Containerised workshops enable rapid setup and redeployment
- ✓ Handles runflat and pneumatic tyres across military fleets
- ✓ Integrated storage systems keep tyres organised and accessible
- ✓ All equipment securely stowed and protected during transport
- ✓ Rugged insulated workspace ensures safe, efficient technician
- ✓ Modular systems integrate seamlessly with wider camp infrastructure

Product Overview

We design and manufacture deployable tyre maintenance systems that keep fleets operational in remote and demanding environments. Our solutions deliver full workshop capability directly in theatre, eliminating reliance on fixed infrastructure. Engineered for rapid deployment, they enable efficient inspection, repair, and replacement of tyres on site. By reducing downtime and improving fleet availability, we support mission continuity while ensuring reliable, high-performance maintenance capability wherever vehicles are required to operate.

Our engineering expertise combines expandable ISO container platforms with fully integrated workshop systems. Designed and built in-house, each unit transforms from a compact transport footprint into a spacious, fully functional maintenance facility. This approach ensures efficient global transport by road, rail, sea, or air, followed by rapid deployment on arrival. By controlling design and manufacturing, we guarantee quality, reliability, and performance, delivering a proven solution that supports sustained operations and enhances fleet

Rapid tyre maintenance anywhere. Keep your mission moving forward.

We engineer containerised tyre maintenance facilities that bring full workshop capability directly to the point of need. Designed for forward deployment, our systems reduce the requirement to move vehicles or components to rear locations. This approach improves response times and operational efficiency while minimising logistical burden. By integrating design, manufacturing, and deployment expertise, we deliver solutions that maintain fleet availability, optimise maintenance workflows, and support continuous operations across

Standard Specifications

Tyre Maintenance specifications can vary depending on your configuration
